

CALIFORNIA LABEL PRODUCTS

Brand Identity | Label Solutions

Food, Beverage, Cannabis, Chemical

Flexo Printing

Flexo press is the best option for medium to large label runs. Our capabilities include 8-color flexo press, spot UV, foil stamping, and lamination on a variety of papers and films, with specialized adhesives available.

Cannabis Branding

CLP specializes in all types of cannabis branding including labels for pouches, jars, and tubes. Our design team is ready to help you develop your next cannabis branding project.

Digital Printing

For small to medium label runs, CLP offers high quality digital printing that can be combined with die-cutting, digital cutting, and lamination. This plateless option is great for orders with many SKU changes.

Cannabis Compliance

Compliance labeling is critical for our cannabis customers. CLP offers pre-printed labels as well as thermal printers and blank label supplies so that growers and dispensaries can print their own labels.

Flexible Packaging

We have options including continuous tube packaging, shrink sleeves, and pouches. Printing options include both flexo press and digital.

Brand Protection Tools

With the innovative security hologram label and QR Manager, give your customer a peace of mind that they are getting your authentic product.

In-Plant Inkjet Printers

CLP offers table inkjet label printers from Afinia and Epson. These units produce high quality labels on demand. Our high speed units print at 12ips and are great for small to medium runs.

Automation Equipment

CLP offers industry-leading automation equipment from Colamark. These include units specially designed for high speed and precision labeling on jars, ampoules, vials, pouches, boxes and more.

In-Plant Label Finishers

Along with our inkjet printers, the second step for a manufacturer to print their label production in-plant is a label finisher. This allows you to cut any size or shape label on demand and includes the ability to laminate.

Label Printing Software

CLP is proud to offer label printing software from NiceLabel. Quickly design barcode labels without IT help and improve print productivity. Our staff is trained to provide support for this robust software platform.

Online Ordering

Cal-Link.net™ is CLP's innovative online ordering portal. It's modern interface helps brand-owners and supply chain partners order variable data tags and labels as well as custom branded items.

Certified Service Technicians

Our company's factory-trained technicians have expertise in multiple hardware and software platforms, allowing CLP to offer and support a diverse variety of in-plant printing solutions.
